Nick Mayer Chevrolet Lewisburg, Brand Guideline

Reconstructed from existing sources on 2026-08-17. Every value is traced to its source; open questions are listed for the brand owner. Confidence: H (primary source), M (secondary), I (inferred).

Version 2. Supersedes the guideline reconstructed 2026-07-20. That version worked from a description of the homepage; this one works from the captured file itself, so several values are corrected rather than merely re-confirmed. Corrections are marked **[CORRECTED v1]** and listed together at the end.

Source basis. One source: the dealership homepage, captured as `sources/home.html` on 2026-08-17. It is a DealerOn site (dealer id `dealer-30397`, GM BAC `314191`) on the Chevrolet OEM brand system. The page exposes real theme tokens in `:root`, preloads the OEM typeface from a CDN, and carries a complete `AutoDealer` JSON-LD block, so color, type, and NAP are readable at high confidence for what the site itself declares. No primary brand PDF was supplied, so Chevrolet's own corporate standards remain the authority for OEM-governed assets.

Note, shared rooftop. This store shares its address (861 N. Ellington Pkwy, Lewisburg TN 37091) and its social accounts with Nick Mayer GMC. The two are the Chevrolet and GMC/Buick halves of one group. Phone lines differ by store and department. The homepage also carries Buick and GMC logo assets and links to the sibling GMC domain, so any asset pulled from this page must be checked for the wrong divisional mark.

---

1. Brand Foundation

- **Mission:** [NEEDS INPUT] No formal statement published.
- **Vision:** [NEEDS INPUT] No formal statement published.
- **Values:** Inferred only, from repeated copy claims: local commitment, trusted service, straightforward dealing. "Our commitment is to provide an unparalleled dealership experience."
- **Stated positioning (verbatim):** "one of the finest Lewisburg Chevrolet dealers."

Source: `home.html` meta description and body copy · *Confidence:* M (positioning, quoted) / I (values)

2. Brand Personality & Positioning

- **Positioning:** Authorized Chevrolet new and used vehicle dealer in Lewisburg, TN. The Chevrolet half of the Nick Mayer Chevrolet Buick GMC group.
- **Audience:** Chevrolet shoppers and owners in Lewisburg and the surrounding Middle Tennessee market. The site names Columbia, Franklin, and Fayetteville as its served markets.
- **Personality / archetype:** Inferred as local, welcoming, service-forward. The copy leads with community and reassurance rather than price or urgency.
- **Sub-brand present:** CarBravo, GM's used-vehicle program, appears 33 times with its own logo lockup. It is a GM program mark, not a dealer brand.

Source: `home.html` body copy, logo assets · *Confidence:* M (positioning) / I (archetype)

3. Logo System

Marks present on the page:

Mark	File	Notes
Chevrolet bowtie	`/assets/logos/transparent/chevrolet.png`	OEM mark
Chevrolet bowtie, wide	`/assets/logos/transparent/chevrolet-wide.png`	OEM mark, horizontal
Chevy "Together" lockup	`/static/industry-automotive/logos/supp/chevrolet/chevy-tagline-together.png`	OEM tagline lockup, not a dealer tagline

Mark	File	Notes
Dealer logo	`/static/dealer-30397/logo.png`	The dealer's own mark
CarBravo	`/static/brand-chevrolet/CarBravo/CarBravo-Logo.png`	GM used-vehicle program
Buick	`/assets/logos/transparent/buick.png`	**Sibling division. Not for use on Chevrolet-store creative.**
GMC	`/assets/logos/transparent/gmc.png`	**Sibling division. Not for use on Chevrolet-store creative.**
DealerOn	`/assets/logos/DealerOn/DealerOn_darkgray.png`	Platform vendor mark, not brand

- **Files secured:** Web raster (PNG) only. No vector master (SVG or EPS) is exposed.
- **Casing inconsistency:** the JSON-LD `logo` and `image` fields both point to `Chevrolet.png` with a capital C, while the rendered `<img>` tags use lowercase `chevrolet.png`. On a case-sensitive host one of the two is a broken reference.
- **Clear space / min size / misuse:** [NEEDS INPUT] Governed by Chevrolet brand standards, not derivable from the site.

Source: `home.html` asset references, JSON-LD · *Confidence:* H (which marks exist) / I (usage specs)

4. Color Palette

The `:root` block carries four real theme tokens. These are the dealer theme's screen values; Chevrolet's authoritative corporate palette must come from Chevrolet's own guidelines.

Role	HEX	RGB	CMYK (approx.)	Pantone	Source	Conf.
Primary (site "main")	#262626	38, 38, 38	0, 0, 0, 85	none stated	`:root --main-color`	H
CTA (Chevy blue)	#006DC7	0, 109, 199	100, 45, 0, 22	none stated	`:root --cta-background-color`	H
CTA hover	#0e4180	14, 65, 128	89, 49, 0, 50	none stated	`:root --cta-hover-color`	H
CTA text	#ffffff	255, 255, 255	0, 0, 0, 0	none stated	`:root --cta-font-color`	H
Neutral dark	#333333	51, 51, 51	0, 0, 0, 80	none stated	inline CSS	M
Neutral mid	#777777	119, 119, 119	0, 0, 0, 53	none stated	inline CSS	M
Neutral light	#dddddd	221, 221, 221	0, 0, 0, 13	none stated	inline CSS	M
Neutral lightest	#eeeeee	238, 238, 238	0, 0, 0, 7	none stated	inline CSS	M

[CORRECTED v1] Confidence on the four `:root` tokens is raised from M to H: they are read directly from the declared theme block, not inferred. `--cta-font-color: #ffffff` was missing from v1. Two further neutrals (#dddddd, #eeeeee) are added.

Excluded from the palette on purpose. The frequency-ranked extraction surfaces Bootstrap's default alert colors most often, because DealerOn ships the framework's stylesheet: link blue #337ab7 and hover #286090; success #3c763d, #dff0d8, #5cb85c, #d6e9c6; danger #a94442, #f2dede, #d9534f, #c9302c; warning #8a6d3b, #fcf8e3, #f0ad4e; info #31708f, #d9edf7, #5bc0de. **None of these are brand colors.** They are framework state styles and must never be used as brand values. This is the trap in extracting a palette from a Bootstrap site: the most frequent color is almost never the brand color.

Contrast (WCAG 2.1).

Pair	Ratio	Verdict
#006DC7 on #ffffff	5.23:1	Passes AA body
#ffffff on #006DC7	5.23:1	Passes AA body. Confirms the CTA token pairing
#0e4180 on #ffffff	10.06:1	Passes AAA
#262626 on #ffffff	15.13:1	Passes AAA
#333333 on #ffffff	12.63:1	Passes AAA

Pair	Ratio	Verdict
■ #777777 on □ #ffffff	4.48:1	FAILS AA body (needs 4.5:1). Passes AA large text only

[CORRECTED v1] The previous version stated "No failing brand color on this palette." That is wrong. ■ #777777 measures 4.48:1 on white, which is 0.02 short of the AA body minimum. It is a genuine fail for body copy and legible only at large text sizes (18pt regular or 14pt bold and above). Do not adjust the brand color to fix this; restrict its use instead, or ask the owner to approve a darker mid-neutral such as ■ #767676, which clears 4.54:1.

5. Typography

- **Primary typeface, headings and body: ChevySans**, Chevrolet's OEM typeface. Applied site-wide: `body{font-family:'ChevySans'}` and again on every heading level `h1` through `h6`, plus `.btn`, `label`, `b`, and `strong` at bold weight.
- **Weights hosted:** four files preloaded from `cdn.dlron.us/assets/fonts/chevy-sans/`: `ChevySans-Regular.woff2`, `ChevySans-Demi.woff2`, `ChevySans-Bold.woff2`, `ChevySans-CondensedRegular.woff2`.
- **Secondary typeface: Lato**, self-hosted by DealerOn via `@font-face` in six weights (Regular, Medium, Semibold, Bold, Black, plus the base family). Present and served, but not applied to `body` or to headings in this capture.
- **Fallbacks:** Helvetica Neue, sans-serif.
- **Icon fonts, not brand:** FontAwesome, Glyphicons Halflings, bootstrap-icons.

[CORRECTED v1] The previous version recorded ChevySans as display-only and Lato as the body typeface. The CSS says otherwise: ChevySans is set on `body` and on all headings. Lato is loaded but not applied in this capture. Anything built to match this site should set ChevySans as the primary face for both roles, with Lato as the fallback rather than the body face.

Type scale (framework base, M confidence): H1 36px · H2 30px · H3 24px · H4 18px · H5 14px · H6 12px. DealerOn display classes add `.heading-xl` at 60px (40px at narrow widths) and `.heading-lg` at 42px, with a jumbotron H1 at 63px.

Scale conflict, flagged rather than resolved: `.h1` is redefined at least five times across the stylesheet (26px, 24px, 22px, 20px, and 32px with a 28px line-height), and `h2.heading-lg` overrides to 34px. The effective size therefore depends on cascade order and viewport. Treat the base scale above as indicative, not authoritative.

Source: `home.html` font preloads, `:root`, inline CSS · *Confidence:* H (typefaces and weights) / M (scale)

6. Imagery & Photography

- **Observed:** Chevrolet vehicle-forward OEM imagery, with responsive media locked to declared aspect ratios: `--desktop-aspect: 3.2` and `--mobile-aspect: 1.5`. Those are real declared values and should be respected by any new hero asset.
- **Subject / mood / treatment / clichés to avoid:** [NEEDS INPUT] Chevrolet's imagery standards govern this.
- **Practical constraint for this store:** because the lot is shared with Nick Mayer GMC, any dealer-shot photography risks capturing GMC or Buick signage. Check every lot photo before use.

Source: `home.html` `:root`, asset references · *Confidence:* H (aspect ratios) / I (treatment)

7. Iconography & Graphics

- **Icon fonts in use:** FontAwesome, Glyphicons Halflings, bootstrap-icons.
- **Style / stroke / radius:** [NEEDS INPUT] These are platform icon sets, not a brand-defined system. There is no dealer or Chevrolet icon language to extract from this source.

Source: `home.html` `@font-face` and stylesheet links · *Confidence:* H (which sets load) / I (style rules)

8. Layout & Grid

- **Platform:** DealerOn, Bootstrap 3 grid, slick carousels.
- **Declared media aspect ratios:** desktop 3.2:1, mobile 1.5:1, from `:root`. H confidence.

- **Grid / spacing units / container widths:** [NEEDS INPUT] Bootstrap defaults apply (12 columns, 15px gutters, container breakpoints at 750/970/1170px), but nothing dealer-specific is declared, so these are framework values rather than brand standards.

Source: `home.html` `:root`, framework detection · *Confidence:* H (aspect ratios) / M (framework) / I (dealer-specific units)

9. Voice & Tone

Traits, inferred from real homepage copy: welcoming, reassuring, service-forward, plain rather than promotional. Consistently first-person plural.

Examples, verbatim:

- "At Nick Mayer Chevrolet Lewisburg, we're proud to be your trusted Chevrolet dealer in Lewisburg, TN. Our commitment is to provide an unparalleled dealership experience, whether you're searching for a new or used vehicle or need expert service and parts."
- "Our knowledgeable team is ready to assist you in finding the perfect vehicle that meets your needs, whether you're interested in a robust truck, a family-friendly SUV, or a fuel-efficient sedan."
- "We're excited to welcome you to Nick Mayer Chevrolet Lewisburg. Our friendly team is ready to provide you with exceptional service and assist with all your automotive needs."
- "Our service and parts department ensures your vehicle stays in top condition with professional maintenance and genuine Chevrolet parts."

Grammatical person: the site's own voice is **first person plural addressing second person** ("we", "our", "you"). This is worth stating explicitly because it conflicts with the entity-named third-person construction that structured content requires. Both are legitimate in their own place, and the difference needs an owner decision rather than a silent choice.

Recurring phrases: "trusted Chevrolet dealer", "our knowledgeable team", "hassle-free experience", "one of the finest Lewisburg Chevrolet dealers".

Terms observed, flagged for the owner:

- "**pre-owned**" and "**used**" both appear on the same page ("new and pre-owned options", "used inventory", "used cars"). No house preference is discoverable.
- "**genuine Chevrolet parts**" appears in the service copy. This is not a GM program name. The OEM programs are Genuine GM Parts and ACDelco. The phrase is the site's own wording, so anything inheriting it inherits the error.
- **Smart quotes are present** in the OEM truck-lineup copy ("everything you've come to expect"), using a curly apostrophe. Copy lifted from this page will carry banned characters.
- **Tone shifts / banned terms:** [NEEDS INPUT] No documented guide exists.

Source: `home.html` body copy · *Confidence:* M (quoted examples) / I (traits)

10. Digital Application & Identity Details

- **Legal / display name: Nick Mayer Chevrolet Lewisburg**. One exact form, 52 occurrences in body copy, and the same string in the JSON-LD `name`. No competing variant appears anywhere on the page. High confidence.
- **Tagline:** [NEEDS INPUT] No dealer tagline. The "Together" lockup is Chevrolet's OEM tagline.
- **Boilerplate (JSON-LD `description`, verbatim):** "Nick Mayer Chevrolet Lewisburg is a Chevrolet dealer in Lewisburg, TN. We specialize in new Chevrolet, used cars, service, and financing."
- **Meta description (SEO voice, verbatim):** "Nick Mayer Chevrolet Lewisburg of Lewisburg TN serving Columbia, Franklin, Fayetteville, is one of the finest Lewisburg Chevrolet dealers."
- **Title tag:** "Lewisburg Chevrolet Dealer in Lewisburg TN | Columbia Franklin Fayetteville Chevrolet Dealership Tennessee." Geo-phrased for SEO; does not lead with the dealer name.
- **Address (NAP):** 861 N. Ellington Pkwy, Lewisburg, TN 37091, US. Confirmed in JSON-LD `PostalAddress`, the footer, and body copy. H confidence.
- **Phones, by department:** Sales 931-246-4218 · Service 931-246-4351 · Parts 931-300-2764. All three confirmed in the JSON-LD `department` array with matching labels. H confidence. Distinct from the GMC store's line.

- **Hours:** Monday to Friday 09:00 to 19:00 · Saturday 09:00 to 18:00 · Sunday closed (no `opens` / `closes` published). Source: JSON-LD `openingHoursSpecification`. H confidence for what is declared; confirm Sunday is a closure rather than an omission.
- **Social handles:** Facebook `/NickMayerChevyBuickGMC/` · Instagram `/mayeroflewisburg/` · YouTube channel `UCvy83RBaRieJv2JENu8q5JA`. All three from JSON-LD `sameAs`. This is the shared group set, identical to the GMC store's.
- **GM BAC:** 314191 (from the Parts accessories URL). **DealerOn dealer id:** 30397.

Domains, and this is the significant finding. Four different hostnames appear on one homepage:

Domain	Role	Occurrences
`nickmayerchevroletgmcoflewisburg.com`	Canonical, JSON-LD `@id` and `url`, Service department	14
`buy.nickmayerchevroletgmcoflewisburg.com`	Digital retailing subdomain	7
`nickmayergmcoflewisburg.com`	Sibling GMC store	3
`nickmayerchevroletbuickgmc.com`	JSON-LD Sales department `url`, Parts accessories path	1

The canonical is `https://www.nickmayerchevroletgmcoflewisburg.com/`, but the Sales department in the structured data points customers at a different registered domain. Any page built for this client must use the canonical host, and the Sales department entry is a defect in the site's own schema.

Source: `home.html` JSON-LD, canonical link, footer, body · *Confidence:* H

Source Register

#	Source	Type	Location / URL	Captured (file)	Date	Reliability
1	Dealership homepage	Website	`https://www.nickmayerchevroletgmcoflewisburg.com/`	`sources/home.html`	2026-08-17	Secondary

Access gaps

- [NEEDS INPUT] **Chevrolet corporate brand standards.** Not supplied. Holds the authoritative palette (Pantone and CMYK), logo clear space, minimum size, misuse rules, and imagery standards. Everything marked OEM-governed in this document stays open until this is provided.
- [NEEDS INPUT] **Dealer brand or style PDF, if one exists.** None supplied. Would be primary and would outrank every value here.
- [NEEDS INPUT] **Interior pages.** Only the homepage was captured. Inventory, service, and finance pages may carry additional voice and layout signal.
- [NEEDS INPUT] **Social profiles.** Not captured. Would confirm the handle set and show applied imagery treatment.
- [NEEDS INPUT] **Vector logo masters.** Only web PNG is exposed.

Corrections to the 2026-07-20 version

#	v1 stated	v2 finds	Why it matters
1	"Display / headline: ChevySans. Body / UI: Lato."	ChevySans is set on `body` and all of `h1` to `h6`. Lato is loaded but not applied in this capture.	Anything built to match the site would use the wrong body typeface.
2	"No failing brand color on this palette."	#777777 measures 4.48:1 on white and fails AA body by 0.02.	An accessibility claim that is not true, in a document used to justify color choices.
3	Palette tokens rated M confidence.	Read directly from the declared `:root` block. H confidence.	Understating confidence invites unnecessary re-litigation of settled values.
4	`--cta-font-color` absent.	#ffffff, declared.	The CTA pairing was incomplete, so nothing recorded what text color sits on the blue.
5	Two neutrals recorded.	Four (#333333, #777777, #dddddd, #eeeeee).	Incomplete neutral ramp.
6	Type scale `[NEEDS INPUT]`.	Base scale extracted, with the multi-override conflict documented.	Partially closable, and the conflict is itself the useful finding.
7	Layout `[NEEDS INPUT]`.	Declared media aspect ratios 3.2 and 1.5 recovered.	Real constraints for hero asset production.
8	Hours not recorded.	Full opening-hours specification recovered.	Needed for LocalBusiness schema on every page.
9	Logo set: bowtie, "Together", dealer logo.	Plus CarBravo, and Buick and GMC divisional marks present on the page.	The sibling-division marks are an active misuse risk on a shared-rooftop site.

#	v1 stated	v2 finds	Why it matters
10	Domain not recorded.	Four hostnames, canonical identified, Sales department pointing at a different domain.	Page builds need the canonical host, and the schema defect is reportable to the client.

Open Items, for the brand owner

Blocking, needed before pages are built from this kit:

1. [NEEDS INPUT] **The 30-mile conflict.** The site names Columbia, **Franklin**, and **Fayetteville** as served markets, and the meta description and body copy both repeat that set. Franklin is roughly 33 miles from the store and Fayetteville roughly 38. Both exceed the 30-mile proximity rule that page content is held to. Either log a standing approved exception for the two, or record that the served-market list for content purposes is narrower than the site's own. Until this is decided, every page built from this kit reproduces the finding. **This is the same conflict raised in the Stage 1 review of the Colorado versus Tacoma page, and it originates here, not in the page.**
2. [NEEDS INPUT] **Grammatical person.** The site's voice is first-person plural addressing "you". Structured content requires the named entity in third person. Confirm which applies where, and whether second person is permitted in body copy at all.
3. [NEEDS INPUT] **House term for pre-owned units.** The site uses "pre-owned", "used cars", and "used inventory" interchangeably. Pick one.
4. [NEEDS INPUT] **Banned terms list.** None documented.
5. [NEEDS INPUT] **OEM parts program name.** The site says "genuine Chevrolet parts", which is not a GM program. Confirm Genuine GM Parts or ACDelco. **This resolves the open flag in the Stage 1 Colorado versus Tacoma review, and identifies the site as where the wording came from.**
6. [NEEDS INPUT] **Canonical Chevrolet social set.** The handles are the shared group accounts. Confirm they are intended for Chevrolet-store use, or supply a Chevrolet-specific set.

Accessibility:

7. [NEEDS INPUT] ■ **#777777 fails AA body at 4.48:1.** Approve one of: restrict it to large text only, or replace it with a compliant mid-neutral such as ■ #767676 (4.54:1). Not resolved unilaterally, because it is a brand color.

Defects in the client's own site, worth reporting to them:

8. **JSON-LD `geo` is `latitude: 0, longitude: 0`.** The dealer's structured data places the store at Null Island in the Gulf of Guinea. This is a live local-SEO defect and the highest-value item on this list for the client's visibility.
9. **`og:url` is malformed and carries campaign tracking:** `...com/%3Futm_source=google&utm_medium=organic&utm_campaign=confluence&utm_content=website_button`. The `?` is percent-encoded, so the query string is part of the path, and UTM parameters do not belong in a canonical social URL at all.
0. **Sales department `url` points to `nickmayerchevroletbuickgmc.com`**, not the canonical host.
1. **Logo filename casing mismatch:** JSON-LD references `Chevrolet.png`, the markup uses `chevrolet.png`.
2. **Sunday has no published hours.** Confirm closure rather than omission, since an absent specification and a stated closure are different signals to Google.

OEM-governed, still open:

3. [NEEDS INPUT] Mission, vision, values. No formal statement published.
4. [NEEDS INPUT] Dealer tagline. None exists; "Together" is Chevrolet's.
5. [NEEDS INPUT] Logo clear space, minimum size, misuse rules. Chevrolet standards.
6. [NEEDS INPUT] Authoritative Pantone and CMYK values. Chevrolet standards. Every CMYK figure in section 4 is a screen-to-print approximation, not a print spec, and must not be sent to a printer as-is.
7. [NEEDS INPUT] Imagery subject, mood, treatment, and clichés to avoid. Chevrolet standards.
8. [NEEDS INPUT] Dealer-specific grid, spacing units, and container widths. Only framework defaults are discoverable.
