Nick Mayer Ford West — Brand Guideline

*Reconstructed from existing sources on 2026-08-18. Every value is traced to its source; open questions are listed for the brand owner. Confidence: **H** (primary source), **M** (secondary), **I** (inferred).*

Sources used: one complete HTML capture of the Home page (`https://www.nickmayerfordwest.com/`), including the dealer's own inlined CSS token layer, three CMS Custom CSS Blocks, and the page's `AutoDealer` JSON-LD. **Platform:** DealerOn (template 698, dealer style set 857, dealer ID 21583).

> **Read this first.** The dealership appears on its own Home page under **three different name forms**, and the palette contains one **hard accessibility failure** and one **undefined token**. These are unresolved in the sources and are listed in *Open Items* for the owner's decision. Nothing has been silently corrected.

---

1. Brand Foundation

- **Mission:** [NEEDS INPUT] — no mission statement appears on the Home page.
- **Vision:** [NEEDS INPUT] — not present in any captured source.
- **Values (as expressed in copy, not as a declared list):** respect, care, and attention to detail; certified Ford expertise; a "first-class experience." Quoted from the homepage About block: *"our teams of sales advisors, service technicians and financing experts are trained with one focus in mind: addressing each of your needs with the utmost respect, care and attention to detail."*
- **Business definition (verbatim, JSON-LD `description`):** *"Nick Mayer Ford Avon Lake is a Ford dealer in Avon Lake, OH. We specialize in new Ford, used cars, service, and financing."*

Source: `sources/home.html` — About block copy; `AutoDealer` JSON-LD · *Confidence:* M

2. Brand Personality & Positioning

- **Personality (inferred from real copy):** welcoming, service-led, plainly confident. Reassurance-first rather than urgency-first — the page leads with helpfulness ("Use our convenient online form", "there might be a perfect fit for you") rather than discount pressure.
- **Audience:** retail new and used Ford buyers, Ford service customers, and commercial / work-truck buyers (dedicated New Work Trucks, F-Series and Transit inventory paths in the primary nav). Also job seekers ("Join Our Team", "Work With Us").
- **Positioning / differentiation:** local Ford franchise authority plus certified service expertise. The only explicit differentiation claim on the page is *"our technicians are all certified with expertise in the Ford brand."* A dedicated nav item, **"Why Buy From Nick Mayer"**, is the intended positioning page but was not captured.
- **Stated service area (verbatim):** *"Proudly serving Cleveland, Mentor, Solon and Euclid."*

Source: `sources/home.html` — homepage content blocks, primary nav · *Confidence:* I

3. Logo System

Asset	File referenced	Applied size	Alt text	Role
Dealer logo	`/static/dealer-21583/logo.png`	75px H × 115px W (desktop); base rule 60px H	`Nick Mayer Ford Avon Lake`	Primary dealer mark
Ford oval (OEM)	`/assets/logos/transparent/ford-alt.png`	85px H, 10px right margin	`Ford`	Franchise endorsement, sits left of dealer logo
FordDirect	`/assets/logos/FordDirect/FordDirect_darkgray.png`	footer, unsized	`FordDirect Logo`	Provider attribution, not a brand asset

- **Lockup:** the header pairs the **Ford oval (85px) at left with the dealer logo (75px) at right**, separated by 10px. The Ford oval is the taller of the two.
- **Text lockup:** a `.dealerName h3` text treatment exists (antennaRegular, 24px) but is **suppressed** — `.desktop .dealerName, .mobile .dealerName { display: none }` in a Custom CSS Block. The image logo is used in its place on all breakpoints.
- **Background:** the logo is always presented on **white** (`.headerWrapper { background-color: #ffffff }`).
- **Files secured:** none. Only raster PNG paths were referenced; no file was captured.

- **Clear space / min size / misuse:** [NEEDS INPUT] — not specified anywhere in the sources.

Source: `sources/home.html` — `/assets/styles/857/header/header.css`, Custom CSS Block, `<img>` markup · *Confidence:* H (applied sizes), — (master files absent)

4. Color Palette

Core brand tokens

These four are declared as CSS custom properties in the dealer's own `:root` block — the highest-confidence brand values available.

Role	HEX	RGB	CMYK (approx.)	Pantone	Token	Source	Conf.
Primary — brand navy	#0c3470	12, 52, 112	89, 54, 0, 56	[NEEDS INPUT]	`--main-color`	`857/common.css` `:root`	H
Primary hover	#114aa0	17, 74, 160	89, 54, 0, 37	—	`--main-hover`	`857/common.css` `:root`	H
Accent — CTA amber	#feb245	254, 178, 69	0, 30, 73, 0	[NEEDS INPUT]	`--cta-color`	`857/common.css` `:root`	H
Accent hover	#ff9f15	255, 159, 21	0, 38, 92, 0	—	`--cta-hover`	`857/common.css` `:root`	H
Secondary — steel blue	#257aa7	37, 122, 167	78, 27, 0, 35	—	`--cta-background-color`	`857/common.css` `:root`	H
Surface — off-white	#f7f7f7	247, 247, 247	0, 0, 0, 3	—	`--alt-color1`	`857/common.css` `:root`	H

Where they are applied. Navy `#0c3470` is the main navigation bar, the footer (`.custom-footer.bg-main`), offer blocks, pagination active state, and `.btn-main`. Amber `#feb245` is the primary CTA button (with **black** text), all header/footer/social icons, the nav dropdown hover state, and the underline indicator on the vehicle model tabs. Steel blue `#257aa7` is the outline-button color (`.btn-alt1`) and the active carousel indicator.

Extended UI palette

Also set in the dealer's own layer, but applied only to secondary components.

Role	HEX	RGB	Applied to	Source	Conf.
Link blue	#0071ad	0, 113, 173	all `<a>` text, `.text-cta`	`857/common.css`	H
Link hover	#0b74ab	11, 116, 171	`a:hover` , `.btn:hover`	`857/common.css`	H
UI accent cyan-blue	#2d96cd	45, 150, 205	`.btn-alt4` hover, quickNav panel footer (80% alpha), banner search widget, About-block icon hover	`857/common.css` , Custom CSS Block	M
UI accent hover	#2a8bbe	42, 139, 190	banner widget button hover	`857/common.css`	M
Deep slate	#1c394f	28, 57, 79	`.btn-alt5` hover	`857/common.css`	M
Deep navy	#002a44	0, 42, 68	`.nav-pills` active	`857/common.css`	M
Divider blue	#7aa5cc	122, 165, 204	About-block heading rules	Custom CSS Block	M

Neutrals

Role	HEX	RGB	Applied to	Source	Conf.
White	#ffffff	255, 255, 255	header, page and banner background	`857/common.css`	H
Surface grey	#f2f2f2	242, 242, 242	`.bg-alt4`	`857/common.css`	H

Role	HEX	RGB	Applied to	Source	Conf.
Neutral dark	#5e6265	94, 98, 101	`.bg-alt2` (white text)	`857/common.css`	H
Neutral mid	#7f848a	127, 132, 138	`.bg-alt3` (white text)	`857/common.css`	H
Body text	#252525	37, 37, 37	`body`	template layer, applied site-wide	H
Muted text	#636363	99, 99, 99	`.text-muted` , nav icon labels	`857/common.css`	H
Divider grey	#c9c9c9	201, 201, 201	model-tab heading rules	Custom CSS Block	M

Explicitly excluded

- **Bootstrap 3.4.1 framework defaults** — `#337ab7` , `#3c763d` , `#8a6d3b` , `#a94442` , `#31708f` , `#5cb85c` , `#5bc0de` , `#f0ad4e` , `#d9534f` , and the alert background/border set (`#dff0d8` , `#f2dede` , `#fcf8e3` , `#d9edf7` , `#d6e9c6` , `#ebccd1` , `#faebcc` , `#bce8f1`). These are the highest-frequency colors in the file but are framework state colors, not brand.
- **Platform chrome** — `#e00000` (footer `.personalInfo` link, set in DealerOn template `698/layout.css`) and `#c72020` (saved-vehicle heart icon).

Contrast (WCAG 2.1 AA — measured on the pairs the site actually applies)

Pair	Ratio	Body ≥4.5:1	Large ≥3:1
White on navy #0c3470 (nav, footer, offer blocks)	12.06:1	PASS	PASS
Amber #feb245 on navy #0c3470 (nav hover)	6.70:1	PASS	PASS
Black on amber #feb245 (primary CTA)	11.67:1	PASS	PASS
Black on amber #ff9f15 (CTA hover)	10.22:1	PASS	PASS
Body #252525 on white	15.33:1	PASS	PASS
Muted #636363 on white	6.01:1	PASS	PASS
Link #0071ad on white	5.30:1	PASS	PASS
Steel blue #257aa7 on white (outline button)	4.75:1	PASS	PASS
White on #5e6265 (`.bg-alt2`)	6.16:1	PASS	PASS
White on #114aa0 (`.btn-main` hover)	8.36:1	PASS	PASS
White on amber #feb245 (dropdown hover, `857/common.css`)	**1.80:1**	**FAIL**	**FAIL**
White on #7f848a (`.bg-alt3`)	**3.77:1**	**FAIL**	PASS

The amber failure is a **conflict, not a settled rule**: `/assets/styles/857/common.css` sets `.dropdown-menu li a:hover { background-color: var(--cta-color); color: #fff }` (1.80:1) while `/assets/styles/857/header/header.css` sets the same state to `color: #222` (8.84:1). Both ship. See *Open Items*.

Standing rule derived from the sources: amber `#feb245` is a **background-only** color. It carries black or near-black text (`#000` on `.bg-cta` and `.btn-cta`), never white.

5. Typography

- **Headings, navigation, buttons:** `antennaRegular` , falling back to `Arial, Helvetica, sans-serif` . Applied to `h1` – `h6` , `nav` , and `.btn` . Antenna is the Ford corporate typeface; it is served here from the Adobe Fonts (Typekit) kit `gpc7ewp` . *Source:* `857/common.css` , `header/header.css` · *Conf.* H (declared) / M (foundry unverified)
- **Weight families** (declared as separate family names, not numeric weights):

Utility class	Family
`.font-extra-light`	`antennaRegularExtralight`
`.font-light`	`antennaRegularLight`
`.font-regular`	`antennaRegular`
`.font-bold` , `.heading-bold`	`antennaRegularBold`

- **Body:** `Arial, Helvetica, sans-serif` — 18px / 20px line-height, `#252525`. *Source:* `857/common.css` (`body`), template layer · *Conf.* H
- **Platform-only face:** `Lato` (self-hosted `.woff2`, weights 400/500/600/700/900) is scoped to the vehicle detail and search-results columns (`.vdp__left-column` , `.vdp__right-column` , `.wasabi_srp`). This is DealerOn inventory chrome, **not** a brand typeface. *Conf.* H
- **Type scale:**

Element	Desktop	Notes
H1	36px	
H2	30px	
H3	24px	also the dealer-name lockup size
H4	18px	20px in quickNav cards ≥992px, 14px ≤991px
H5	14px	
H6	12px	
Body	18px / 20px	13px for body and `.btn` at ≤991px
`.lead`	21px	
Nav links	14px (13px at 992–1199px)	
Service button	21px ≥1200px	

- **Fallback stack:** `Arial, Helvetica, sans-serif` for both heading and body — the same stack, so a Typekit failure collapses the heading/body distinction entirely.
- **Weight policy:** headings, `.btn` , and inventory titles are forced to `font-weight: normal !important` . Separately, `b, strong` are forced to `font-weight: bold !important` .

6. Imagery & Photography

- **Vehicle lineup:** OEM Ford stock cutouts, transparent PNG, 320px color-matched renders (`/assets/stock/…`), on white. Three-quarter front view, no shadow, no scene.
- **Hero:** a single dealer-supplied lifestyle photograph — F-150 Platinum (`/static/dealer-21583/homepage/24_FRDNTRKX0101_Ford_F150_P702_84A1753_03_CMYK_Platinum.jpg`) — with a **black gradient scrim** for white-text legibility: `rgba(0,0,0,0.3) → rgba(0,0,0,0.2)` on desktop, deepening to `rgba(0,0,0,0.7) → rgba(0,0,0,0.4)` at ≤991px. Positioned `center 43% / cover` .
- **Banners:** full-width **1920 × 600** with a **600 × 400** mobile crop, plus a `?width=768` responsive variant. Two streams run side by side — OEM Tier 3 campaign creative (`/static/bam-ford/…` : Summer Sales Event, MLB Sweepstakes, J.D. Power award, Ford Service/Tire offers) and dealer-built SPM banners (`/static/dealer-21583/SPM/<year>/<month>/<date>/…`).
- **Treatment:** `.img-rounded` = 10px radius; quickNav cards = 20px radius; a decorative frame `10px solid rgba(255,255,255,.1)` on `.squareBorder` .
- **Mood:** clean, product-forward, daylight. No people appear in any captured image.
- **Avoid:** [NEEDS INPUT] — no do-not list exists in the sources.

Defect noted: every 1920×600 and 600×400 banner image carries an **empty `alt` attribute**. Only the logo and OEM model cutouts have alt text.

Source: `sources/home.html` — `<img>` / `<source>` markup, Custom CSS Block · *Conf.* H

7. Iconography & Graphics

- **Icon libraries in use (four, concurrently):** Font Awesome 4 (self-hosted), Bootstrap Icons 1.11.3 (jsDelivr CDN), DealerOn `do-icons` (`@import '/assets/fonts/do-icons/css/do-icons.css'`), and Glyphicons (Bootstrap 3).
- **Color:** icons are amber `var(--cta-color)` by default and shift to `var(--cta-hover)` on hover — header utility icons, footer contact icons, and social icons all follow this. Icons inside the About block are white, hovering to `#2d96cd` .
- **Sizes:** header utility icons `2.4em` ; social icons 26px with 4px/8px margin; carousel arrow glyphs 21px in a 45px black circle (desktop), 27px in a 33px square (≤1199px).
- **Decorative rules:** a 1px horizontal rule flanking centered `h4` headings — `#7aa5cc` in the About block (on navy), `#c9c9c9` in the model-tabs block (on white), 70% width, hidden at ≤767px.

- **Motion:** `250ms ease-in-out` is the standard transition; card hover and image scale use `300ms ease-in-out`. Model cutouts sit at `scale(0.9)` and grow to `scale(1.0)` on hover; quickNav cards translate 25px upward to 0.

Source: `sources/home.html` — `857/*`, Custom CSS Blocks, `<link>` tags · *Conf.* H

8. Layout & Grid

- **Grid:** Bootstrap 3.4.1, 12 columns. Breakpoints 768 / 992 / 1200px, with site-specific overrides at 1441px, 1541px, and 1800px.
- **Container widths:** header and nav `98%`; content sections, custom footer and footer `1440px` at ≥1441px; `.contentSection1` `1540px` at ≥1541px.
- **Header:** fixed to the viewport, white, `z-index: 1030`, **145px tall** (`--header-height: 145px`), with `#content` offset by a matching `padding-top: 145px`.
- **Vertical rhythm — content sections:** 50px top/bottom ≥992px, 35px at 768–991px, 30px at ≤767px. Custom footer: 60px, dropping to 40px at ≤991px, with a 30px top margin that is removed on the homepage.
- **Hero (`.introSec`):** `min-height` 800px ≥1200px, 570px at 992–1199px, auto with 35px padding at ≤991px. The quickNav card row overlaps it upward by `-180px` (≥1200px) or `-140px` (992–1199px).
- **Radii:** buttons 25px (full pill); quickNav cards 20px; images 10px; panels, wells, and small input groups **0**.
- **Elevation:** `rgba(99,99,99,.2) 0 -2px 8px` on quickNav cards; `rgba(0,0,0,.1) 0 5px 5px` on the banner search block.
- **Buttons:** `padding: 6px 25px`; large `10px 30px`; `border-radius: 25px`.

Source: `sources/home.html` — `857/*`, `templates/698/*`, Custom CSS Blocks · *Conf.* H

9. Voice & Tone

- **Traits (derived from real copy, marked inferred):**
- **Warm and inviting** — *"Use our convenient online form to schedule your next test drive. Receive a first-class experience from one of our exclusive test drive staff members."*
- **Quietly confident, evidence-backed** — *"We're confident in the quality of our service center, especially since our technicians are all certified with expertise in the Ford brand."*
- **Conversational, question-opening** — *"Are you an expert? Whether it's sales or service, there might be a perfect fit for you on our team."*
- **Community-anchored** — *"Proudly serving Cleveland, Mentor, Solon and Euclid."*
- **Grammatical person: first-person plural throughout** — "we're", "our teams", "our convenient online form", "our inventory". The dealership names itself in the third person only in the boilerplate ("drivers choose Nick Mayer Ford") and in schema.
- **Tone shifts:** OEM model copy is imported verbatim and reads noticeably more editorial than the dealership's own blocks — *"The standard 2026 Expedition SUV has a cavernous cargo area… from sheets of plywood to a kayak for your next outdoor adventure."* Legal disclaimers switch to formal third person ("Although every reasonable effort has been made…").
- **Recurring key phrases:** "Proudly serving", "first-class experience", "certified with expertise in the Ford brand", "utmost respect, care and attention to detail", "Why Buy From Nick Mayer", "More Space for More Possibilities" (OEM Expedition campaign line).
- **CTA verb set:** Search New Inventory · Search Used Inventory · Schedule Service · Schedule Test Drive · Value Your Trade · Custom Order · Apply for Financing · Apply Now · View Staff · Get In Touch · Talk to the GM.
- **Sentence-case headings.** All headings are sentence or title case; no all-caps headings appear. Nav labels are title case with `text-transform` explicitly reset to `initial` on utility labels.
- **Banned terms:** [NEEDS INPUT] — no list exists in the sources.

Source: `sources/home.html` — homepage content blocks, nav labels, disclaimer · *Conf.* I

10. Digital Application & Identity Details

Name — unresolved conflict

Three forms appear on the same page:

Form	Where it appears
Nick Mayer Ford West	H1, custom-footer heading, sticky footer bar, and the domain `nickmayerfordwest.com`
Nick Mayer Ford Avon Lake	dealer logo `alt`, header dealer name, JSON-LD `name`, footer legal line
Nick Mayer Ford	body boilerplate, nav item "Why Buy From Nick Mayer"

No trademark symbol (™/®) is used with any form. The Ford wordmark and oval appear under franchise endorsement.

NAP (as published)

- **Name:** Nick Mayer Ford Avon Lake *(per logo alt, header, and JSON-LD)*
- **Address:** 33450 Lake Road, Avon Lake, OH 44012, US — consistent in the header, footer contact block, footer legal line, and JSON-LD `PostalAddress`.
- **Geo:** 41.505043, −82.047958 *(JSON-LD `GeoCoordinates`)*
- **Phone — Sales:** 440-961-5090 *(header, footer, JSON-LD `telephone` as `+14409615090`)*
- **Phone — Service:** 440-961-5106 *(header, footer contact block)*
- **Unlabeled fourth number:** 419-550-1420 appears in the footer legal line only, with no department label. See *Open Items*.
- **Website:** https://www.nickmayerfordwest.com

Hours (JSON-LD `openingHoursSpecification`)

Day	Hours
Monday	9:00 AM – 7:00 PM
Tuesday	9:00 AM – 6:00 PM
Wednesday	9:00 AM – 6:00 PM
Thursday	9:00 AM – 7:00 PM
Friday	9:00 AM – 6:00 PM
Saturday	9:00 AM – 5:00 PM
Sunday	Closed (no open/close values)

These reconcile with the on-page header display. Service department hours shown in the header (7:00 AM – 6:00 PM) are **not** represented in the JSON-LD, which repeats sales hours for the Sales department only.

Social

- **Facebook:** https://www.facebook.com/nickmayerfordwest — the only social profile on the page, and the only entry in the JSON-LD `sameAs` array.

Web application rules (as configured)

- Brand colors are consumed through CSS custom properties, not hard-coded — the correct pattern to preserve. New components should reference `var(--main-color)`, `var(--cta-color)`, `var(--cta-background-color)`, `var(--alt-color1)`.
- Background utility classes and their enforced text colors: `.bg-main` → white · `.bg-cta` → **black** · `.bg-alt1` (□ #f7f7f7) → `#222` · `.bg-alt2` (■ #5e6265) → white · `.bg-alt3` (■ #7f848a) → white · `.bg-alt4` (□ #f2f2f2) → inherited.
- Button hierarchy: `.btn-cta` (amber, black text) = primary action · `.btn-main` (navy, white text) = secondary action · `.btn-alt1` (steel-blue outline) and `.btn-alt2` (navy outline) = tertiary.
- Outbound tracking convention observed in `og:url`: `utm_source=google&utm_medium=organic&utm_campaign=confluence&utm_content=website_button`.

Identity

1. **[NEEDS INPUT] Which name form is canonical?** "Nick Mayer Ford West" (H1, footer, domain), "Nick Mayer Ford Avon Lake" (logo alt, header, JSON-LD, footer legal line), or "Nick Mayer Ford" (boilerplate)? All three ship on the Home page. One form must be fixed as canonical, and the logo `alt`, the JSON-LD `name`, and the H1 aligned to it.
2. **[NEEDS INPUT] Is 419-550-1420 a valid dealership number?** It appears once, in the footer legal line, with no department label. The 419 area code covers the Toledo region, not the Cleveland-area 440 used by both labeled numbers. Confirm whether it is a call-tracking number, a sister-store number, or an error.
3. **[NEEDS INPUT] Confirm the stated service area.** The boilerplate names Cleveland, Mentor, Solon and Euclid. Cleveland is within roughly 25 miles of Avon Lake, but Mentor, Solon and Euclid are all substantially farther east — estimated 35–50 miles. If the 30-mile proximity standard applies, three of the four named cities fall outside it. Distances should be confirmed against a routing source before this line is reused.
4. **[NEEDS INPUT] Is there a tagline?** None was found. "More Space for More Possibilities" is OEM Expedition campaign copy and should not be adopted as a dealership tagline. "Why Buy From Nick Mayer" is a nav label, not a tagline.
5. **[NEEDS INPUT] Mission, vision, and a declared values list.** Absent from the Home page. Likely on the un-captured "Our Dealership" or "About Us" pages.
6. **[NEEDS INPUT] Additional social profiles.** Only Facebook was found. If a Google Business Profile, Instagram, or YouTube channel exists, both the footer and the JSON-LD `sameAs` array should list them.

Accessibility

7. **[NEEDS INPUT] Amber + white text fails WCAG at 1.80:1.** `857/common.css` sets the nav dropdown hover to white text on `--cta-color` `#feb245`; `857/header/header.css` sets the same state to `#222` (8.84:1). Both declarations ship. The `#222` treatment should be confirmed as the rule and the white-text declaration removed. This color must not be "adjusted" — the fix is the text color, not the brand amber.
8. **[NEEDS INPUT] `.bg-alt3` white on #7f848a fails body contrast at 3.77:1.** It clears the 3:1 large-text threshold only. Either restrict this surface to large text, or darken the neutral (`#5e6265` at 6.16:1 already passes) — an owner decision, since it changes a defined surface color.
9. **[NEEDS INPUT] Banner images have empty `alt` attributes.** All 1920×600 and 600×400 banner creative on the Home page ships with `alt=""`. Descriptive alt text is needed, or an explicit confirmation that these are decorative.
0. **[NEEDS INPUT] Body line-height is 20px on 18px type (≈1.11).** Tight for long-form reading; 1.5 is the common target. Confirm whether this is intentional.

Assets and technical

1. **[NEEDS INPUT] Logo master files.** Vector (SVG/EPS/AI) masters are needed for the dealer mark, along with reversed and single-color variants, clear-space and minimum-size rules, and a misuse list. Only a raster PNG path exists today.
2. **[NEEDS INPUT] Pantone and print CMYK for navy #0c3470 and amber #feb245.** The CMYK values in this document are naive screen conversions for reference only. A stated value from a brand PDF or the print vendor overrides them.
3. **[NEEDS INPUT] Antenna licence scope.** The typeface is served from Adobe Fonts kit `gpc7ewp`, which was not captured. Confirm which Antenna weights the kit publishes, and whether the licence covers print and social use as well as web.
4. **[NEEDS INPUT] Fallback stack collapses the type hierarchy.** Headings and body share the identical `Arial, Helvetica, sans-serif` fallback, so a Typekit outage erases the heading/body distinction. Consider a differentiated fallback.

5. **[NEEDS INPUT] Undefined CSS token `--cta-alt-hover`.** Referenced by `.footer-sep { border-top: 2px solid var(--cta-alt-hover) }` in a Custom CSS Block, but never declared. The footer separator currently renders with no color. Define the token or point the rule at `--cta-hover`.
6. **[NEEDS INPUT] Malformed logo URL in JSON-LD.** The `AutoDealer` `logo` value reads `https//www.nickmayerfordwest.com/static/dealer-21583/logo.png` — the colon after `https` is missing. The sibling `image` property is correctly formed. Worth fixing, as the malformed value is unresolvable.
7. **[NEEDS INPUT] Orphan orange in the mobile nav.** `857/menu.css` sets the mobile nav toggle to `#fa6900` with a `#f2761c` hover — neither is in the token set and neither appears elsewhere. Confirm whether these are legacy leftovers to retire in favor of `--cta-color`.
8. **[NEEDS INPUT] Four icon libraries load concurrently** (Font Awesome 4, Bootstrap Icons 1.11.3, DealerOn `do-icons`, Glyphicons). Nominate one as the standard for new work so iconography stays consistent.
